I find the XM Satellite Radio traffic and weather channels to be invaluable to me while driving. I can get REAL TIME update on both traffic and weather CONTINUOUSLY without having to wait anywhere from 20 minutes to a half hour between reports on commercial radio stations. Having those CONTINUOUS, REAL TIME reports has already saved me from running into problems BEFORE I reached reported trouble spots. As a result I've been able to successfully avoid reported trouble areas in both traffic and weather, a real time (and at times, safety) saver. I respectfully urge you to REJECT NAB's petition 04-160, so I can continue to receive this valuable service from XM Satellite Radio.
